# THIS IS THE END 😔

But first, follow the instructions:
1. Create a txt file, where you save all the passwords you found in this exercise, for example:

```
PasswordFileA= flag{answer}
PasswordFileAA = flag{answer}
PasswordFileAAA= flag{answer}
PasswordFileAAAA = flag{answer}
```

2. Use your knowledge of asymmetric cryptography and use the public key (which is in this same path) to encrypt the txt file that you created.

3. Send the encrypted file to the Coach (email or WhatsApp) before 6 june 2024 at 6pm.

christian.malpica@cybolt.com

And that's it!

Thanks for your participation :)
